Synopsis: Environmental issues. Repeals the electronic digital signature act. Amends the definition of "owner" for purposes of underground storage tank statutes. Replaces the undefined term "sanitary landfill" with "solid waste landfill". Establishes deadlines for action by the department of environmental management (IDEM) on various permit applications with respect to certain solid waste processing facilities. Expands the grounds on which the commissioner of IDEM may suspend or revoke a drinking water or wastewater operator certification. For purposes of wastewater management statutes, replaces the term "wastewater" with "septage". Provides that wastewater management statutes apply to land application of septage. For the purpose of determining liability of certain owners and operators to the state for remediation of environmental contamination under certain circumstances, applies exemptions to the same extent the exemptions apply under federal law for certain lenders that hold indicia of ownership but do not participate in management. Provides that an environmental restrictive ordinance (ERO) is an ordinance adopted by a municipal corporation that seeks to control the use of groundwater in a manner and to a degree that protects the groundwater against unacceptable exposure to a release of hazardous substances, petroleum, or both. Requires IDEM to give written notice to a municipal corporation that the department is relying on an ERO adopted by the municipal corporation as part of a risk based remediation proposal. Requires a municipal corporation to notify IDEM of adoption, repeal, or amendment of an ERO only if the municipal corporation received that written notice.

Effective: Upon passage; July 1, 2010.
